Description

New Vepr Made in Russia Hunting /target rifle in traditional caliber of 7.62X39mm. With 50% more HEAVY DUTY receiver that also has double reinforcement and heavy duty Target barrel ! A true comparison is with the Russian tiger Draganov.Having made a reputation for accuracy,This heavy duty Barrel not found on most other rifles has Chrome lined chamber and Bore. This Vepr system along with excellent quality of all parts, to many to list here, has earned a legendary reputation for total dependability from the jungles to Siberia ! Vepr Comes with 1 US 30 round magazine, cleaning rod , cleaning . This barrel length is 16.5" inches. Has scope rail on left side of receiver for mounting telescopic scopes or holographic sights on a picatiny rails. **The rifle will take most in spec HI cap AK mags & drums and does not require special magazines**

Veprs are built for extreme demands above and beyond all others with extra heavy duty receiver, extra heavy duty reinforcment each

side and an extra heavy hammer forged chrome lined target like barrel. The combination of years of proven design with attention to detail has produced legendary dependability and legendary accuracy from the jungles to Siberia!

Bolt of the Vepr models in 7.62x39 caliber are fitted with two locking lugs.

Enhanced against weather and mechanical wear the cartridge chamber, barrel bore, gas cylinder, and bolt- support rod are chrome lined.

A vepr goes through a thorough inspection process at every part, every step of building and must pass the final thorough examination by a quality control committee before any vepr ever leaves the arsenal.

1. Why the Vepr is better than the average AK
2. Hammer-Forged, Russian Chrome-Lined, Heavy Barrel. Most durable AK Barrels Made.

Hammer Forging is a process whereby the lands and grooves of the barrel are formed by hammering the barrel material against a mandrel. This process not only creates sharp and well defined lands and grooves but also leaves an excellent surface finish on said surfaces. An additional benefit is that the barrel material becomes work hardened. The chrome plating helps prevent against wear and corrosion. We don't believe you can buy a better barrel on any rifle.

Rifles based on Kalashnikov's operating system have not been known for their exceptional accuracy. The renowned AK47 rifle was designed to function flawlessly in all environments and temperatures. In other words, functionality was more important than accuracy. However, because the VEPR has a stiffer receiver than the AK47, better accuracy can be expected.

3. Most Accurate. Consistently better groups than other AKs.
4. True RPK Receiver. Stiffer and longer wearing than any other AK receiver. Made for Soviet Squad Automatic Weapon.
5. The VEPR costs more for a reason - It is simply the finest Kalashnikov based rifle available in the U.S. market
6. Will work with most In Spec Hi Capacity AK 47 Mags & drums .
