Description

Romanian AK47 Model 1963 Under Folders Barreled Receiver DIY Kit, Do it Yourself kit has all of the hard work done . You just need to add the finishing touches ! This kit starts off with Original Military Surplus Romanian Model 1963 kits coupled with a 4150 V Nitride Treated threaded barrel . Atlantic Arms properly installs the barrel and Morrissey receiver and each kit is head spaced & checked from proper alignment . Since this is not a completed firearm it will ship to your FFL dealer designated as a Receiver even though the barrel is attached . You will need to install fire control , Safety selector & furniture set . These are Military Surplus kits and will show character and usage but are fully

functional and solid . You can leave the metal surface with the original patina or refinish for a new look .This is great way to save money and customize your rifle with the furniture and metal finish of your choice . 99% of the parts used are Original Romanian import the only US part is the receiver & barrel so please be aware of this and make your rifle 922R compliant during the final build process . Please note metal finish may vary from kit to kit . We do not offer any special request for markings , years , metal patina, matching numbers etc . Comes with under folder stock and folder mech shown in picture.

Please Note: Receiver Must be in 922R for License

Receiver cannot be marked with any serial number or other any special request for markings, years, matching numbers etc.

It is your responsibility to be familiar with your current local gun laws BEFORE placing your order. Please feel free to email us with questions you may have.
